SUMMARY

Design engineer with a Master's in Human-Computer Interaction who designs interfaces and builds them in production code. Spent the last three years at the Utah Department of Health and Human Services building and maintaining the design system for iChart, a data dashboard, from Figma concepts to production Angular components. Experienced with AI tools (Claude, ChatGPT, GitHub Copilot) for speeding up design-to-code work while keeping UI consistent and accessible.

SKILLS

Design engineering:	Design systems, component libraries, Figma-to-code, accessible components, documentation
Design:	UX/UI design, atomic design, wireframing, prototyping, information architecture, usability testing, accessibility (WCAG)
Frontend:	Angular, React, Next.js, TypeScript, JavaScript, HTML, CSS/SASS, WordPress
Design tools:	Figma, Sketch, Adobe Creative Suite, Axure
AI tools:	Claude, ChatGPT, GitHub Copilot
Workflow:	Jira, GitHub, GitLab, Asana, Slack

EXPERIENCE

Design Engineer — Utah Department of Health and Human Services — Oct 2023 – Nov 2026
Remote · Contract via Smith Johnson Tech

- Built and maintained the design system for iChart, a DHHS data dashboard, defining the components, patterns, and standards used across the product
- Developed UI concepts in Figma and built them as reusable, accessible Angular components
- Wrote component documentation so developers could ship consistent interfaces at scale
- Used AI tools (Claude, ChatGPT, GitHub Copilot) to speed up design and development work

Senior Design Engineer — Kincaid Information Technology (KIT) — Jan 2023 – Oct 2023
Remote

- Designed and built the user interface for Admin+, a KIT software product, using Angular and Angular Material

Design Engineer — Pinnacle Design Lab — Apr 2020 – Jul 2022
Work under NDA

- Translated Sketch designs into React/TypeScript interfaces alongside the UX/UI designer
- Built a design system of flexible components that adapt to varied datasets and data structures
- Designed interfaces in Sketch and built custom SVG animations with Lottie.js
- Bridged design and development, translating client design needs and technical constraints in both directions

Design Engineer — Good Work Marketing, Inc. — Aug 2019 – Apr 2020
New Orleans, LA

- Built custom WordPress sites for agency clients on a Webpack, SASS/Bootstrap, and PHP stack
- Delivered sites that non-technical clients could update themselves (news, promotions, events)
- Kept sites secure and current: updated WordPress versions, replaced deprecated plugins, and removed harmful scripts

Design Engineer — 365 Connect — Oct 2017 – Aug 2019
New Orleans, LA

- Sole designer on the redesign of the company's media platform, working directly with the CEO
- Redesigned the rental application user flow and the public 365 Connect business website
- Built the site in HTML/CSS/JS and handed it off to the offshore team, translating the CEO's requirements for developers
- Created social media content and custom illustrations in Photoshop and Illustrator

EDUCATION

M.A., Human-Computer Interaction — State University of New York at Oswego
B.A., Psychology — State University of New York at Oswego
